

Ishida Uni-7 Retail Scales

Made for the fast paced world of the retail environment, Interweigh offers the UNI-7 retail scale from Ishida. These unique retail weighing scales also function as compact counter top printers that make it a breeze to print all types of labels and receipts.

Equipped with a browser function the UNI-7 allows data from the Internet to be downloaded and then printed out. The UNI-7 also can display information on related products such as logos, messages and data, which can then be printed onto labels.

Compact enough to sit on any countertop the UNI-7 uses a front loading cassette method, though the memory can be expanded to up to 2GB. The scale printer has 5 pre-selected languages that are listed on the selection screen. Features a touch screen and strong graphics.
